LOTRONEX® (LOW-trah-nex) Tablets alosetron hydrochloride Read this information carefully before you start taking LOTRONEX Tablets. Read the information you get with LOTRONEX each time you refill your prescription. There may be new information. This information does not take the place of talking with your doctor. What is the most important information I should know about LOTRONEX? LOTRONEX is used to help women who have irritable bowel syndrome (IBS) with diarrhea as their main symptom (diarrhea-predominant IBS). Women who have constipation as their main IBS symptom should not use LOTRONEX. LOTRONEX has not been shown to help men. IBS generally does not result in a need for bowel surgery (operation). A few patients taking LOTRONEX can develop intestinal side effects serious enough to need hospitalization and possibly surgery. Before starting LOTRONEX, discuss with your doctor how troublesome your IBS symptoms are, the possible benefits of LOTRONEX, and its possible side effects to decide if LOTRONEX is right for you. Possible serious side effects of LOTRONEX include: 1. Constipation LOTRONEX may result in constipation that infrequently may be serious enough to block movement of stools through the intestines. In a few women, this may lead to hospitalization and possibly surgery. Do not start taking LOTRONEX if you are constipated. If you get constipated while taking LOTRONEX call your doctor right away. If you develop any of the following symptoms while waiting to talk to your doctor, stop taking LOTRONEX: severe constipation worsening or bothersome constipation with increased abdominal discomfort Do not start taking LOTRONEX again until you talk to your doctor.	1	MEDICATION GUIDE

2. Ischemic colitis		
Some patients (about 1 in 700) developed ischemic colitis while using LOTRONEX. Ischemic colitis is a serious condition caused by reduced blood flow to the intestines. This condition may		

LOTRONEX® (alosetron hydrochloride) Tablets

37	need hospitalization and possibly surgery. Stop using LOTRONEX and call your doctor right			
38	away if you have any of these signs of ischemic colitis:			
39	 new or worsening abdominal (lower stomach area) pain 			
40	 bloody diarrhea or blood in the stool (bowel movements) 			
41				
42	What is LOTRONEX?			
43	LOTRONEX is a prescription medicine used to treat IBS in women who have diarrhea as their main			
44	symptom (diarrhea-predominant). LOTRONEX has not been shown to help men with IBS.			
45				
46	IBS is also called irritable colon and spastic colon. IBS causes lower abdominal (stomach) pain and			
47	discomfort, urgency (a sudden need to have a bowel movement), and irregular bowel habits, such as			
48	diarrhea or constipation. It is not clear why people develop IBS. Some scientists think IBS is caused			
49	by an overreaction to a body chemical called serotonin. This may cause patients' intestines to be			
50	overactive. IBS can be constipation-predominant, diarrhea-predominant, or can involve constipation			
51	and diarrhea. LOTRONEX is only for women with diarrhea-predominant IBS.			
52 53	LOTRONEX does not help everyone. For those who get relief, LOTRONEX helps reduce IBS-related			
54	lower abdominal pain, abdominal discomfort, urgency and diarrhea. You may get relief of some or all			
55	of your symptoms after 1 to 4 weeks of use. If LOTRONEX does not reduce your symptoms after 4			
56	weeks, stop using it and tell your doctor.			
57	weeks, step daing it and tell your destor.			
58	LOTRONEX does not cure IBS. When you stop taking LOTRONEX, your IBS symptoms will probably			
59	return within 1 week.			
60				
61	Who should not take LOTRONEX?			
62	LOTRONEX is not right for everyone. It is only for women with troublesome diarrhea-predominant			
63	IBS.			
64	1. Do not start taking LOTRONEX if you are constipated			
65	2. Do not ever take LOTRONEX if you			
66	are constipated most of the time			
67	 have ever had severe constipation or a serious problem from constipation 			
68	have ever had ischemic colitis			
69	have ever had Crohn's Disease or ulcerative colitis			
70	have active diverticulitis			
71	are allergic to LOTRONEX or any of its ingredients (see list of ingredients at the end of this			
72	Medication Guide).			
72	, , , , , , , , , , , , , , , , , , ,			

LOTRONEX[®] (alosetron hydrochloride) Tablets

74	If you take LOTRONEX under these conditions, you increase your risk of getting serious side effects.			
75				
76	Tell your doctor if you are pregnant, planning to get pregnant, breast feeding, or taking or planning			
77	to take other prescription or non-prescription medicines.			
78				
79	How should I take LOTRONEX?			
80	Take LOTRONEX exactly as your doctor prescribes it. You can take LOTRONEX with or without			
81	food. If you miss a dose of LOTRONEX, do not double the next dose. Wait until the next scheduled			
82	dosing time and take your normal dose.			
83				
84	What are the possible side effects of LOTRONEX?			
85	Constipation is the most common side effect of LOTRONEX. A few patients may develop			
86	serious intestinal side effects. A description of these side effects, how to identify them, and			
87	what action to take if you get them, is in the first section of this Medication Guide, "What is			
88	the most important information I should know about LOTRONEX?" Refer to the information			
89	about constipation and ischemic colitis in that section.			
90				
91	These are not all the side effects of LOTRONEX. Your doctor or pharmacist can give you a more			
92	complete list.			
93				
94	General advice about prescription medicines			
95	Medicines are sometimes prescribed for purposes other than those listed in a Medication Guide. If			
96	you have any concerns about LOTRONEX, ask your doctor. Your doctor or pharmacist can give you			
97	information about LOTRONEX that was written for health care professionals. Do not use LOTRONEX			
98	for a condition for which it was not prescribed. Do not share LOTRONEX with other people.			
99				
100	Ingredients: alosetron hydrochloride, lactose (anhydrous), magnesium stearate, microcrystalline			
101	cellulose, and pregelatinized starch. The blue film-coat contains hydroxypropyl methylcellulose,			
102	titanium dioxide, triacetin, and indigo carmine.
